Introduction

What is the Events Addon?

The Events Addon is a comprehensive event management system for organizing, scheduling, and displaying events and calendars. It allows you to create detailed event listings with date and time information, locations, recurring schedules, and rich content.

What can you do with it?

- **Create and manage events** with detailed information including dates, times, locations, and descriptions
- **Set up recurring events** with daily, weekly, monthly, or yearly recurrence patterns
- **Organize events** using categories and event types
- **Link events to destinations** to show where events take place
- **Enable user submissions** so visitors can submit their own events for review
- **Search and filter** events by date, category, destination, and other criteria
- **Display featured events** to highlight special events
- **Sync with Google Calendar** for external calendar integration
- **Provide API access** for frontend applications to retrieve and display event data

Key Features

- **Event Management**: Create comprehensive event profiles with dates, times, locations, and descriptions
- **Recurring Events**: Support for daily, weekly, monthly, and yearly recurring patterns with flexible scheduling options
- **Date and Time Management**: Start and end dates/times with timezone support
- **Location Integration**: Link events to destinations or specify custom locations
- **Category Organization**: Organize events using categories
- **Event Types**: Different event types with customizable layouts
- **Image Management**: Support for main images, header images, and image galleries
- **User Submissions**: Allow authenticated users to create and manage their own events
- **Approval Workflow**: Review and approve user-submitted events before they go live
- **Search and Filter**: Powerful search capabilities with date range filtering
- **API Access**: RESTful API endpoints for retrieving event data
- **Google Calendar Integration**: Sync events with Google Calendar

- **RRULE Support**: Standard recurrence rule format support

Who is this for?

This addon is designed for:

- **Content Managers**: Who need to create and maintain event information
- **Administrators**: Who manage the overall system and approve user submissions
- **Frontend Developers**: Who need to integrate event data into websites or applications
- **End Users**: Who may submit their own events through the API
